REF: AAAL/COM/CS/2022/0005 DATED: 11.04.2022

Circular No: 0005

SUB: Wheelchair Assistance

AllianceAir will be shifting to new PSS W.E.F 15th April 2022. It has been decided to modify rule for Wheelchair Assistance on it's entire Domestic network effective 15th April 2022 till further notice.

Alliance Air will do its best to accommodate your needs. We have limited wheelchairs available at all airports (with our handling agency or airport operator) to assist passengers with transportation from check-in to the boarding gate and from the aircraft steps to the arrival hall at the destination.
No charges will be levied for the use of wheelchairs assistance at all Indian Airports for passengers travelling on Alliance Air flights. Passengers are requested to put in their request for wheelchair at the time of booking or at least 24hrs prior to scheduled departure time of the flight

Carriage of own wheelchair

1. Passengers travelling with their own wheelchair may use their own manual or battery-powered (Non-spilling battery) wheelchair up to the boarding gate and/ or the aircraft steps (subject to permission granted by the respective airport authority).

2. The said wheel chair should be collapsible type to accommodate in aircrafts baggage hold area.

3. Incapacitated passengers who are dependent on a wheelchair or other assistive devices and are travelling with such equipment would be entitled to an additional checked baggage allowance free of charge subject to the limitations of the aircraft as per DGCA guidelines. However, for safety reasons they are subject to carry-on size and weight as per the limitation of the aircraft. Passengers need to seek prior approval from Alliance Air for the carriage.

4. Checked-in wheelchairs will be returned to the customer at the destination airport subject to the limitation of the aircraft. However, Alliance Air shall not be liable for any damage arising while handling the wheelchair.

Alliance Air allows only manual/ collapsible wheelchairs on all its flights. Unfortunately, battery-powered wheelchair(s) with a wet cell/spillable battery shall not be accepted since it's corrosive in nature and is considered to be a 'Dangerous Good'.
